

AKINDI

EFFORTLESS GRADING

Akindi is a web-based assessment software that automatically grades multiple choice assessments using regular paper and any scanner.

We allow instructors to print bubble sheets from any printer, scan the completed assessment using any scanner and access the results instantly online. We also have an app for iOS that allows instructors to scan the assessments in real time using their phone.

Akindi works in 3 simple steps

Print

Create an assessment to start customizing your bubble sheet. Print as many copies as you need. You may print an extra copy to fill out the answer key, or you may opt to fill out the answer key online before scanning the completed answer sheets.

Scan

Once the students have completed the assessment, you can batch scan every answer sheet into one PDF file using your scanner's document feeder. If you are using our iOS app, hold the phone up to scan the assessments using your phone's camera.

Upload

Once you have scanned the answer sheets into a single PDF file, you can upload that file to the Akindi website or email it to a special Akindi email we'll provide you. Your answer sheets will be graded instantly, and you'll be ready to view your assessment results.

FEATURES

The screenshot shows the Akindi web interface for creating an assessment. The browser address bar shows 'akindi.com'. The page has a 'BACK' button and a 'CLOSE' button. The main heading is 'Create an assessment'.

The form includes the following fields and options:

- Course Name:** A dropdown menu with 'PHY 102' selected.
- Assessment name:** A text input field with 'Quiz 1' entered.
- Select Layout:** A dropdown menu with 'Standard' selected.
- Prefill Student Information:** A checkbox that is checked.
- Sort printed sheets by:** Two buttons, 'Student Name' (highlighted in orange) and 'Student Id'.
- Show in title:** Two checkboxes, 'Course Name' and 'Assessment Name' (both checked), and one unchecked checkbox 'Student Name'.

To the right of the form is a preview of a bubble sheet template. The preview shows a grid of bubbles for a 'Quiz 1 - PHY 102' assessment. A circular inset provides a magnified view of the bottom section of the bubble sheet, showing the 'Student Number' header and a grid of bubbles for student identification.

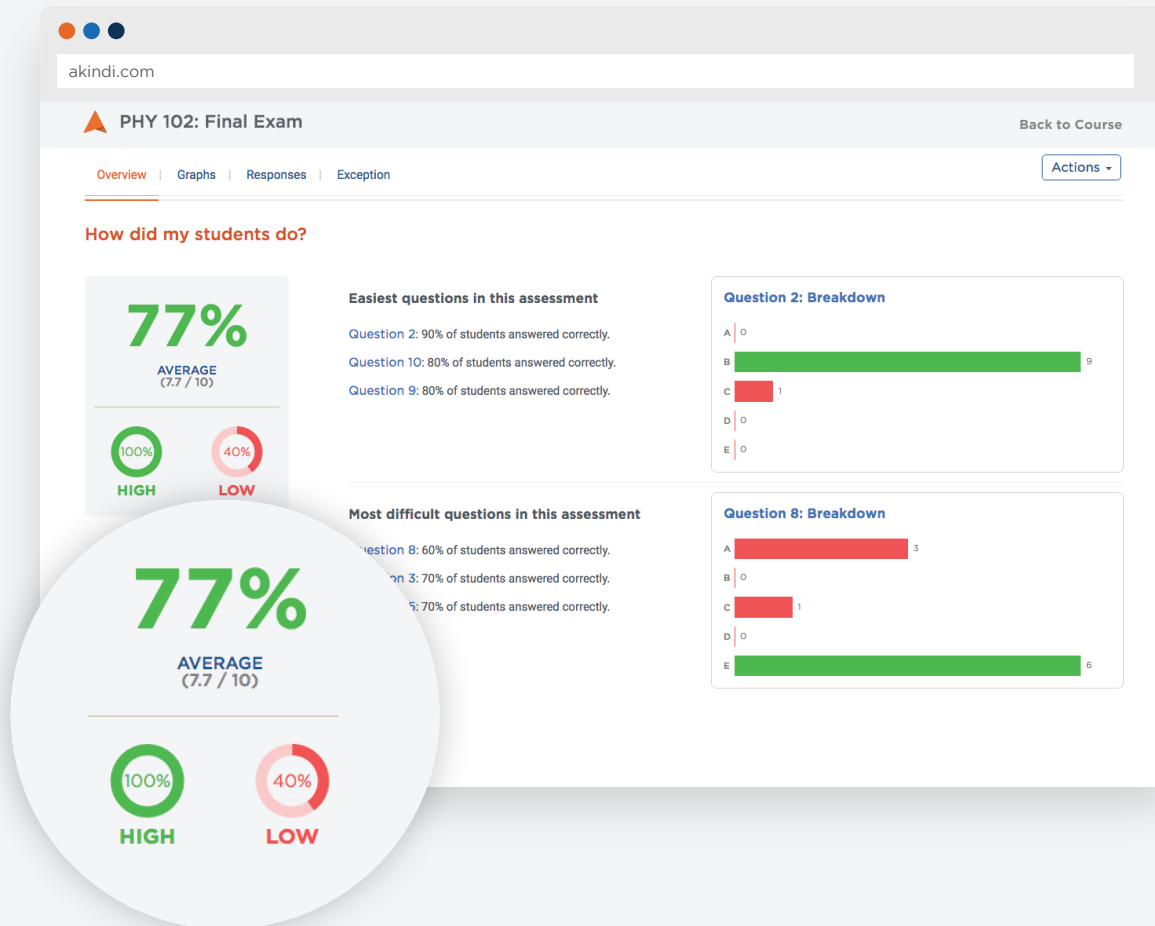

Akindi is packed with great features to ensure your next assessment is an effortless one.

Customizable Templates

Select a suitable bubble sheet for your assessment from one of our many bubble sheet templates. Go ahead and customize the information you would like to appear on it from the text in the title to the students' names and IDs.

FEATURES

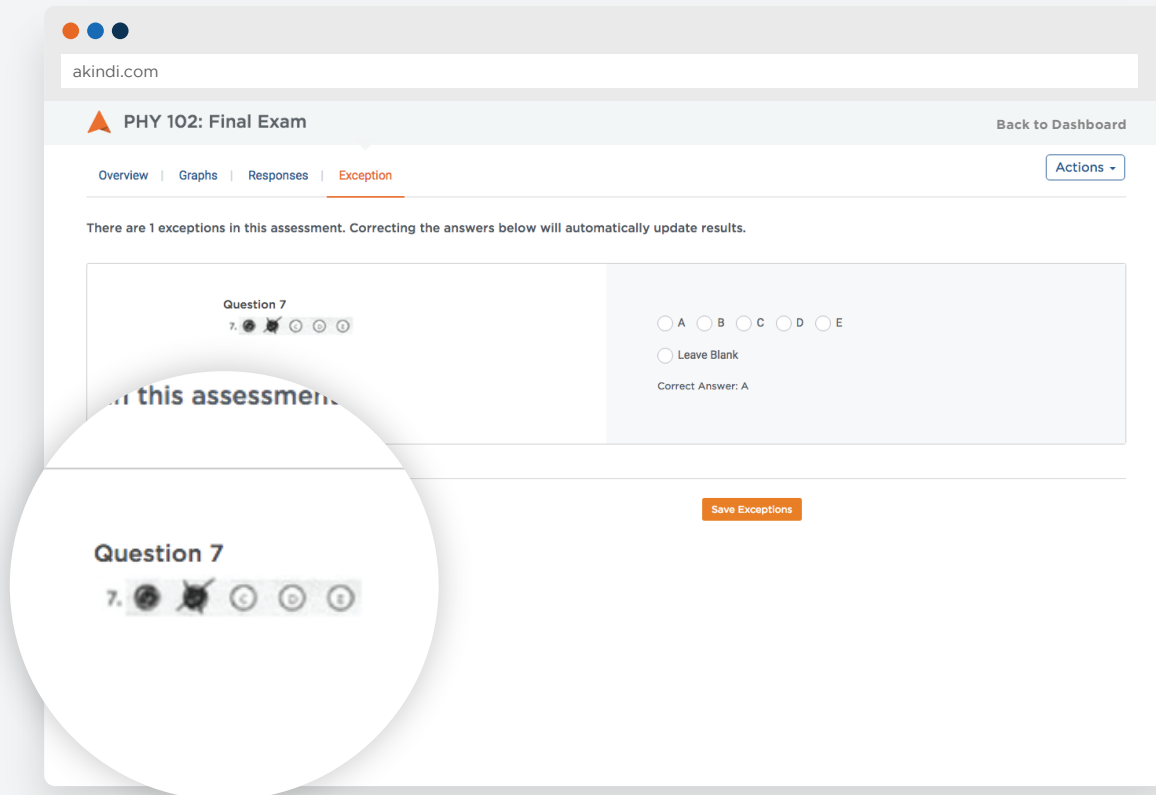

Analytics and Insights

Quickly understand your students' performance and how well each question was constructed. We provide easy-to-understand graphs and data to help instructors figure out areas for improvement.

FEATURES

Easy exceptions handling and digitally archived sheets

Bubble half-filled in or crossed out? Student ID not bubbled in? Our software isolates those individual errors and allows the instructor to correct them without re-scanning. We also keep an image of each answer sheet archived so you don't have to worry about keeping around the paper copies.

Automatically syncs with your LMS

We integrate seamlessly with your LMS for easy transfer of your class rosters into Akindi and your student marks back to your LMS. All it takes are a few set up steps by your LMS administrator.

And many more features...

Advanced Marking

Choose between exact match, either/or, or true/false questions

iPhone app

Scan and upload completed answer sheets using the Akindi app

Course sections

Grade assessments and view results for multiple sections of the same course

Automatic sheet sorting

Upload multiple assessments in a batch and Akindi will categorize them based on the corresponding QR code

Upload sheets by email

Scan assessments and email the pdf to a special Akindi email address from any document feed scanner

Adjust answer key

Make changes after the fact and Akindi will re-adjust student marks automatically

Akindi takes the security of user data very seriously. We have taken exhaustive measures to ensure that instructors can upload and store grades on Akindi with confidence.

Data Centre Security

Akindi works closely with its hosting partner to ensure the highest possible levels of security at both the data center and physical machine level. Our hosting provider is SOC 2 certified and undergoes regular security and compliance audits.

Data Redundancy

In addition to hourly on-site and daily offsite backups, Akindi stores all customer data on encrypted hard disks in a RAID1 configuration, ensuring no single hardware failure will result in a loss of data or even an interruption of service.

Data Encryption

Akindi encrypts all customer data, all the time, both in transit and at rest. The Akindi.com website uses industry-standard 2048 bit RSA encryption (HTTPS with TLS 1.2) and actively refuses connections which could be insecure. All machines in Akindi's infrastructure utilize full disk encryption, and backups are encrypted before leaving the machine.

Akindi is trusted by thousands of educators to help them conduct and grade assessments effortlessly.

“

I have found Akindi a big improvement over the previous scan sheet system. The ease by which I can import my roster, customize my test and get fast reports that are clear to read has made Akindi a very valuable tool.

Norman Shaw
Ryerson University

We are a Toronto based company focused on building better assessment tools to help educators better understand their students' performance and mastery level.

We believe that an incremental change in an educators performance yields exponential benefit to the students. We also believe that the best tools are those that are simple to use and require the least amount of effort to learn. That is why your feedback is critical to helping us make Akindi the best experience everytime you sign in.
